

## *Board of Education Goals*

### *2016-17*

1. Continue to explore ways to engage the community and to build strong district/community relations.
2. Expand lobbying efforts to include both programmatic and financial issues that affect BH-BL specifically, and more school districts more broadly. Identify three to four key issues of focus and coordinate lobbying efforts with other districts and related associations as appropriate.
3. Strengthen and focus district partnerships. Use the list of existing partnerships and recognized standards to conduct a gap analysis. Develop a target list of new expanded partnerships.
4. Continue to monitor development of district (ESSA and state) initiatives to identify and measure characteristics of highly effective schools. Investigate dashboards that will display metrics including benchmark and historical data points. After gathering input from faculty, administration, students and parents we will develop 3-5 metrics (short/long term) to be reported upon in January 2017.
