

## **COMMUNITY INVOLVEMENT**

**P1200**

The Board of Education is committed to a comprehensive community relations program to assure a full appreciation of the educational program and to promote broad participation of Board members, staff, students, and community in seeking solutions for problems and in promoting the continuing improvement of the school program.

To this end the Board establishes the following goals for community involvement:

1. To promote a genuine spirit of cooperation between the schools and the community at large.
2. To establish an active partnership between the school and the community, in which educators and community members work together toward the improvement of the total educational program.
3. To make arrangements to share resources with community organizations in support of programs designed to benefit youth specifically and the community at large.
4. To foster understanding of the need for constructive change, and solicit public advice on how the district can best achieve its educational goals.
5. To promote staff interest in community needs and encourage volunteer participation by students and staff to make the community a better place to live.
6. To involve citizens, business and community agencies in the work of the schools.
