

BOARD MEMBER DEVELOPMENT OPPORTUNITIES

P2521

Board of Education members are expected to demonstrate high qualities of leadership. Accordingly, a Board should place a high priority on the importance of efforts to enlarge the horizon and abilities of its members through a planned and continuing program of in-service education for its members. Participation in district-sponsored training sessions and conferences, workshops, and conventions at the local, state, and national levels are ways to deliver Board member in-service training. Funds will be budgeted annually in support of these efforts. Individual Board members will be reimbursed for authorized out-of-pocket costs incurred through participation in Board-approved development activities.
