

EVALUATION OF SUPPORT SERVICES

P8000

The Board of Education recognizes that support services are an integral part of a comprehensive educational program. To achieve the highest quality of support services on all levels, a critical appraisal of the programs as they operate in each school and at each level is essential. Support services include safety and maintenance programs, transportation, food services, insurance management, business and office services and buildings and grounds inspections.

The purposes of the evaluation procedures are to:

1. indicate the quality of support services;
2. show the extent to which they preserve an orderly and healthy environment in each school;
3. provide information regarding effective protection and maintenance of District property and material resources as well as individual safety.

The Superintendent, working with the Assistant Superintendent for Support Services, shall develop and implement procedures for evaluation of support services. The Board of Education should be informed on an annual basis of the status of support services in the District. Also, the Board of Education is responsible for developing and implementing any plan for improvement as deemed necessary by the annual review.

Approved March 2001
