

REPORTING OF HAZARDS

P8111

The Board of Education recognizes its responsibility to provide an environment which is reasonably secure from known hazards. The Board therefore directs the Superintendent of Schools and all professional and support staff members to comply with occupational safety and health regulations, including the Hazard Communication Standard and "Right-to-Know" legislation.

The Assistant Superintendent for Support Services will develop and oversee a written hazard communication program. Such program will include the following:

1. the acquisition, maintenance and review of Material Safety Data Sheets (MSDS's) for all known hazardous materials on district property;
2. the compilation of a hazardous materials inventory;
3. employee training in hazardous materials management and protection; and
4. the recording of all incidents involving exposure to known hazardous materials.

It is the responsibility of the entire school community to be aware of potential hazards and to report concerns to appropriate building or district administrators.
