

## **TRANSPORTATION**

**P8400**

The State Legislature has recognized the importance of district-provided student transportation relative to a student's education and has enacted comprehensive legislation obligating the District to provide transportation services to designated groups of students.

The Assistant Superintendent for Support Services, assisted by the Supervisor of Transportation, will have overall responsibility for providing and maintaining transportation services.

### **TRANSPORTATION OF KINDERGARTEN CHILDREN**

Transportation shall be provided for kindergarten children on a basis which provides pick-up and discharge locations within 1/10 mile of the pupil's home and also as may be practical in terms of turn-around space without backing up on private property and without substitution of buses regularly scheduled for such transportation.

If sufficient seats are available on such a route, other primary grade children may be picked up upon the same basis where such service is provided a kindergarten child.
